

5 Themes Collage

Instructions:

Your 5 themes collage will be a collection of photographs, newspaper and magazine images, internet graphics, and mementos and souvenirs that you will use to represent the 5 themes of Geography. Your collage should be artistically displayed so your viewer, in this case myself and your classmates, can gain a greater understanding of your knowledge of the 5 Themes. Be creative and unique in your interpretations but you must be able to explain your choices to the class.

You will have some class time to work on the collage, but it will require mostly outside work. Start collecting magazines that you can use for images of your culture.

Your collage must include **2-3 images of each Theme:**

1. Place
2. Location (both Absolute and Relative)
3. Region (Functional, Formal & Perceptual)
4. Movement (both movement of Land & movement of People)
5. Human Environmental Interaction (both permanent change, and temporary change)

In addition, you will make a short presentation of your collage to your classmates and you will explain the various Themes and why you selected them.

Your 5 Themes of Geography Collage is worth 30 points and is due Fri Sept 5th.
